

# bathtubs

There is nothing better.

Taking the time to relax and pamper yourself regularly has a series of very important positive effects on **both body and mind**. Available both in the whirlpool and classic versions, these acrylic bathtubs are highly modular and can adapt to any space requirements.

# Teuco whirlpools

A physical and mental experience.

The whirlpool acts by producing jets of water mixed with air, which reach your body's tissues and trigger an alternating compression-decompression action. This makes for improved **blood circulation**, stimulating **cellular metabolism** and simple drainage of excess liquid.

**Leaving your skin smooth and relaxed.** Muscle and mind are relaxed.

Teuco's range of bathtubs gives you the opportunity to choose your ideal massage thanks to four different types of whirlpool teamed with the effects of chromoexperience.

**Blower:** a stream of air bubbles that float upwards towards the surface of the tub, creating an effect similar to "sparkling water".

**Basic:** the traditional whirlpool enhanced by the simplicity of touch controls.

**Hydrosilence:** all the pleasure, which only Teuco can offer, of a unique, silent massage, whatever the intensity.

**Hydrosonic:** the most sophisticated and comprehensive version in the Teuco range. Ultrasound, teamed with the whirlpool, makes the massage penetrate beneath the skin, affecting your whole body, silently.

Choose your ideal massage.
