

steam room

Steam that envelops
your dreams with well-being.

Pasha recreates the pleasant beneficial effect of a Steam Room, where your body is completely surrounded by steam.

The system for "automatic recirculation", which makes it possible to maintain the temperature uniform and constant at all times, guarantees the well-being effect of a Turkish bath achieved when the temperature of the steam is constantly kept between 45 and 50 degrees throughout the cabin. Pasha can be configured to suit the space you have available. The interiors can be configured to your liking with all Teuco options.

The duralight® wash basins and seats make for a fully matching environment.

Wash basins

Seats

Suggested configurations.

Internal/external covering in duralight® tiles.

pasha
