SHOWER ENCLOSURES.

The perfect combination of well-being and aesthetic appeal.

A unique experience.

The 100% steam Turkish bath, the energising shower and the localised massages are all uniquely enjoyable experiences available thanks to Teuco shower enclosures.

EVOLUTION

High profile enclosures capable of giving you strong emotions. The clean and geometric design is based on the use of glass: light, invisible and yet resistant.

A thickness of 8 mm makes it solid and the exclusive Clean Glass antilime-scale treatment, available on all versions, keeps the original glazing effect.

The Duralight™ shower tray is made with a material which merges high performance with a unique texture to ensure prestigious design and beguiling tactile sensations.

NEXT+

Reliable well-being guaranteed by quality construction and materials, such as the high quality **acrylic** which helps to keep the temperature inside the enclosure constant. It is durable and eco-friendly since it can be recycled.

Next+ shower enclosures have the solidity of an indestructible product and are designed to fit in with any décor and to accommodate your every need:

- **lightness and transparency;**
- **great attention to ergonomics, comfort and internal space;**
- **wide choice of shower and Turkish bath functions and versions;**
- **simple installation**
(slot-in assembly system, limited number of components, absence of silicone)

Efficiency and comfort.

LYMPHATIC DRAINAGE

This reactivates and enhances blood circulation and reduces excess fluid. It creates a general feeling of relief from swelling and heaviness. When this function is selected, the vertical massage jets are activated in sequence, from the bottom up, replicating a manual lymphatic drainage treatment.

SCOTTISH SHOWER

A proper work-out for both skin and muscles, an excellent treatment for revitalising blood circulation and making blood vessels and skin more elastic.

It is based on alternating hot and cold jets and is available with all water massages.

Hot water helps ease muscle tension, while cold water tones up tissues.

CHROMOEXPERIENCE

The addition of colour to wellness treatments provides a deeply relaxing experience by involving both body and mind.

Teamed with the steam of a Turkish bath or water massages, coloured light **regenerates mind and body**, but it can also be used when you are not in the enclosure, to create a **pleasant atmosphere** in the bathroom. For this function, Teuco has relied on the lighting technology expertise of another company in the group: iGuzzini illuminazione.

AROMATHERAPY

The Turkish bath is a traditional way to purify and tone the body and mind. Using essential oils and herbs during treatment can be very beneficial.

These essences are absorbed by breathing but also by the body which is immersed in the steam, for beautiful, relaxing sensations.

The Teuco Turkish bath is fitted with a steam outlet and dispenser which can be filled with specific aromatic oils as well as with sachets of phytocosmetic herbs.

Hygiene and safety.

TEMPERED GLASS PANELS

The glass used to make Teuco panels is hardened via a thermal treatment (tempered).

It is very resistant and considered safety glass since, in addition to being strong, it tends to shatter into small rounded pieces which are not particularly dangerous.

CLEAN GLASS

This is Teuco's exclusive lime scale removing treatment for glass panels. Thanks to CleanGlass, water slides off the surface, leaving the glass clear at all times. Cleaning the enclosure takes no time at all: after showering, simply use a dry cloth to wipe away any remaining drops on the panels. It is vital that you don't use specific glass cleaning products as their alkaline-based ingredients could cause irreparable damage to CleanGlass.

DESCALING SYSTEM

In versions fitted with a Turkish bath, this system removes lime scale deposits from the steam generator thanks to a descaling system. The life cycle of the entire system and greater energy efficiency are thus guaranteed.

A comprehensive range of configurations.

The extensive range of Teuco showers offers different types of systems featuring different levels of efficiency and comfort to meet your every need.

TEUCO: EXCLUSIVE WELL-BEING

THE TURKISH BATH, 100% steam.

In 1980, Teuco was the first company to bring steam into a shower enclosure thanks to electronics.

A know-how that is constantly being improved, with patents and exclusive solutions designed to observe the principles of **heat therapy** and a **proper Turkish bath**:

1) Correct temperature (40-50 °C) and 100% steam

The power rating of the system differs depending on the size and performance of each individual Teuco shower enclosure: **2,5 kW- 2,9 kW- 5 kW**

This makes it possible to always:

- reach the optimal temperature of **40-50 °C inside the enclosure**
- produce a high quantity of **steam (100%)**.

2) Even temperature throughout the entire enclosure

Warm air generally tends to rise. For this reason, Teuco developed the **recirculation system**: a fan continuously sucks the warm air back downwards, reintroducing it into the enclosure through the vaporiser.

This way, the temperature inside the enclosure is always even, from head to toe, for the entire duration of the treatment.

3) Constant temperature and energy savings

Teuco shower enclosures are fitted with a **small compact boiler (0.5 litres)** which guarantees a constant and immediate supply of steam: the enclosure is ready for use in just a few minutes and the energy consumption is kept to a minimum.

The Turkish bath: an enjoyable, relaxing and beneficial ritual.

Teuco Turkish baths not only afford moments of relaxation, but also **beneficial effects for the appearance of your skin and the health of the respiratory tract**. **Aromas and essential oils** can be added to the steam, thus stimulating your sense of smell too. You can also add **Chromoexperience**, a system of coloured lights designed in conjunction with iGuzzini illuminazione. Teamed with the steam

of the Turkish bath or the effects of water massages, coloured light **regenerates both body and mind**.

It can also be used when you are not in the enclosure, to create a **pleasant atmosphere** in the bathroom.
